GENERAL NOTES

A second supply of wood is not allowed. If you make a mistake, do your best to work as near to the dimensions on the drawing as possible.

All pieces of wood should be finished to the correct length and their ends neatly trimmed with a plane.

You may use any of the ordinary hand tools, but the use of **glue** and **glasspaper** is **not** allowed.

A finished piece of work that is carefully done may obtain more marks than one that is completed but is inaccurate and shows poor workmanship.

Marks are gained if the work is lightly cleaned with a finely set, smoothing plane before being assembled.

Write your name and candidate number boldly and clearly on each piece of wood in capital letters and numbers which are **6mm** high. If you do not complete the test, you must however submit all the wood together with all that you will have worked on except waste.

Assemble your work before handing it to your invigilator.

You may use any portable power tools and machines that you are acquainted to during your course of study.

INSTRUCTIONS

Figures 1(a) and 1(b) are pictorial sketches of a sofa frame section.

You are required to:

- (a) Make the whole section of the sofa frame shown in **Figs 1(a) and 1(b)**, working from sizes given in **Figure 2** on the Insert.
- (b) Shape part **A** as shown in **Figures 1(a) and 1(b)**.

All measurements are in millimetres.

Any measurements omitted are left to your discretion.

All materials for the practical test are to be supplied by the centre. Supervisors should endeavour to obtain the materials specified. Where this is not possible with the test pieces, a list of sizes used must be supplied. In addition to the usual bench kit, the following tools and machines/power tools will be required.

1. Hand tools:

1 × 19 mm bevel edged chisel per 2 candidates.

1 × sliding bevel/dovetail template per 3 candidates.

1 × router per 6 candidates.

1 × 12 mm bevel edged chisel per 2 candidates.

1 × 10 mm mortice chisel per candidate.

1 × 25 mm firmer chisel per candidate.

2. Portable Power Tools:

router

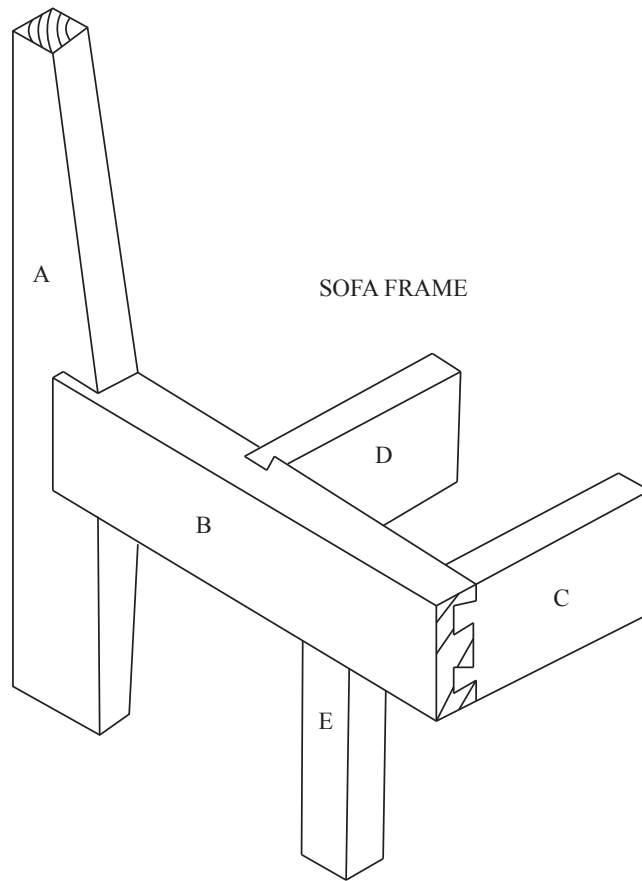

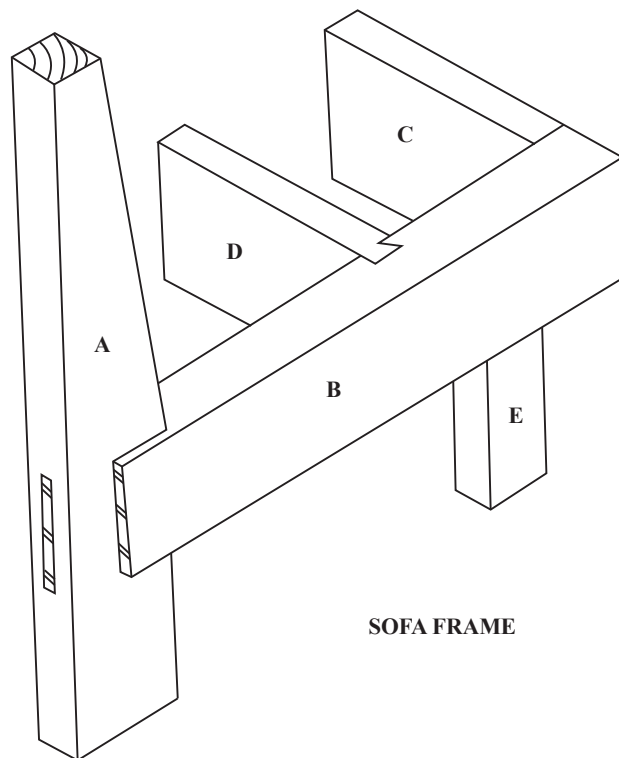

3. Machines:

Pillar drill,

Morticing machine.

The following pieces of wood, previously prepared to size, are to be used.

PIECE A	510 mm × 75 mm × 40 mm,
PIECE B	450 mm × 100 mm × 45 mm,
PIECE C	250 mm × 100 mm × 30 mm,
PIECE D	230 mm × 100 mm × 30 mm and
PIECE E	300 mm × 50 mm × 40 mm.
