GENERAL NOTES

A second supply of wood is not allowed. If you make a mistake, do your best to work as near to the dimensions of the drawing as possible. All pieces of wood should be finished to the correct length and their ends neatly trimmed with a plane.

You may use your discretion where dimensions are not given.

You may use any of the ordinary hand tools and or machines, but do not use glue, glass paper, files, rasps or scrapers.

A well finished piece of work carefully done may gain more marks than one that is completed but is inaccurate and shows poor workmanship.

Marks may be gained if the pencil marks are slightly cleaned off with a finely set smoothing plane before being assembled.

Write your name, centre number and candidate number boldly and clearly on each of the pieces of wood in capital letters. Even if you do not complete the test, you must however, return all the wood with the exception of waste.

Assembled your work and place it in plastic bag before handing it to your invigilator.

PRACTICAL TEST

The pictorial drawing in **Fig.1** on **insert 1** show details of a **CHICKEN FEEDER**.

Fig 2 shows the front view, end view and plan of part of the chicken feeder enclosed in the circle in **Fig 1**.

You are required to:

1. Make the portion enclosed by the circle on **Fig 1**. And work from the sizes given in orthographic projection in **Fig 2**.
2. Determine and make a suitable joint to connect pieces **A** and **D** as indicated within the circle area **Q** in front view of **Fig 2**. Use your own measurement in construction.
3. Make an appropriate shape on piece **B**.

NB: Any measurements omitted are left to your discretion.
The following pieces of wood previously prepared to size are to be used.

Piece A	200 × 60 × 20
Piece B	210 × 60 × 20
Piece C	140 × 60 × 20
Piece D	140 × 40 × 20
Piece E	140 × 35 × 20

All measurements are in millimetres.

NB: For those using machines, ensure that all pieces are initially cut to a safe length of **305 mm**. Then trim each piece to the final dimension as specified in the working drawing.
