PAPER 1 Multiple Choice

4022/1

1 hour 30 mins

SPECIMEN PAPER

1: 50 000 Survey map is enclosed with this question paper.

Additional materials:

Multiple Choice answer sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

Mathematical set

Calculator

INSTRUCTIONS TO CANDIDATES

Answer **all** questions. For each question, there are four possible answers, **A, B, C** and **D**. Choose the correct answer. Record your choice in **soft pencil** on the separate answer sheet provided.

Read carefully the instructions on the answer sheet.

INFORMATION FOR CANDIDATES

There are **forty** questions in this paper. Each correct answer will score **one** mark. Any rough working should be done in this question paper.

This specimen paper consists of 10 printed pages.

For questions 1 – 12 refer to the 1: 50 000 Masvingo map.

1. Which grid has a heritage site?
 - A 2770007774000
 - B 2760007779000
 - C 2700007778000
 - D 2770007773000

2. A person travels for 3,5 km northwards along the road from 2723007774800 towards Masvingo. The person ends up at a
 - A motel.
 - B mine dump.
 - C bridge.
 - D junction.

3. A natural resource used for drying vegetables and gain after harvesting is found in grid
 - A 2700007783000.
 - B 7783000270000.
 - C 2770007770000.
 - D 7770000277000.

4. Which cross section shows change in relief from 2752007770000 to 279500777000.

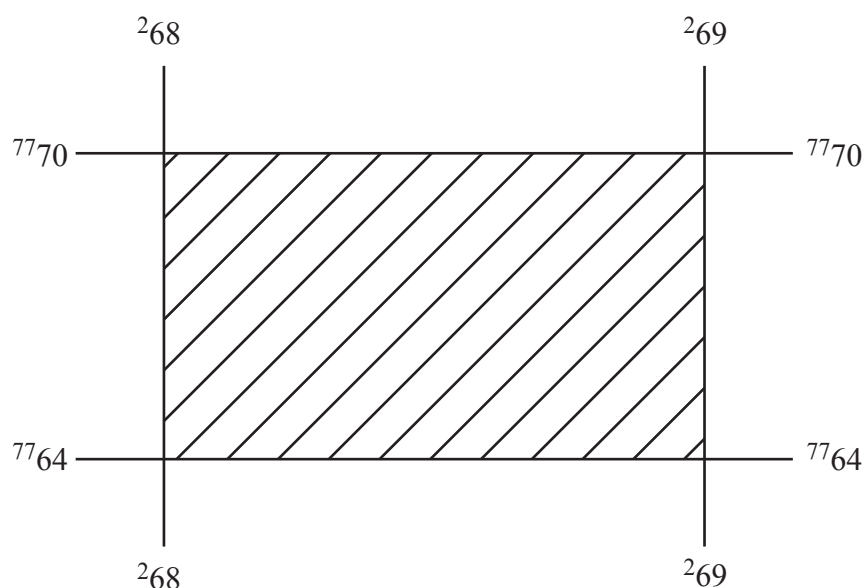

5. Which drainage pattern is formed by Muccheke river and its tributaries?
- A Trellised
 - B Dendritic
 - C Radial
 - D Centripetal
6. Which is the most suitable economic activity that can be done in the area?
- A Game ranching
 - B Crop farming
 - C Bird viewing
 - D Spiritual healing
7. The direction of flow of Muccheke river is
- A North West to South East.
 - B North East to South West.
 - C North West to East.
 - D West to East.
8. What is the bearing of the dip tank at 2680007776000 from the Trigonometrical station at 2716007777800?
- A 247°
 - B 113°
 - C 68°
 - D 45°
9. The people of Masvingo can benefit economically from Lake Mutirikwi through
- A fishing.
 - B skirting.
 - C swimming.
 - D boating.
10. Which climate change related hazard can affect Masvingo Central Business District?
- A drought
 - B flooding
 - C tsunami
 - D mudslides

11. Which is the best way to solve problems caused by mining in grid 2720007775000?

- A Education
- B Refilling
- C Legislation
- D Relocation

12.

Which type of electricity can be generated in the shade area?

- A Thermal power generation
- B HEP generation
- C Nuclear power generation
- D Geo-thermal generation

13. Which of the following is used to record wind direction?

- A Beaufort scale
- B Mercalli
- C Wind rose
- D Wind vane

14. Predicting weather is called

- A weather monitoring.
- B weather forecasting.
- C weather evaluating.
- D weather capturing.

15.

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Temperature (°C)	21	21	20	19	17	15	14	16	18	22	23	21
Rainfall (mm)	130	110	70	25	10	0	0	0	0	20	95	120

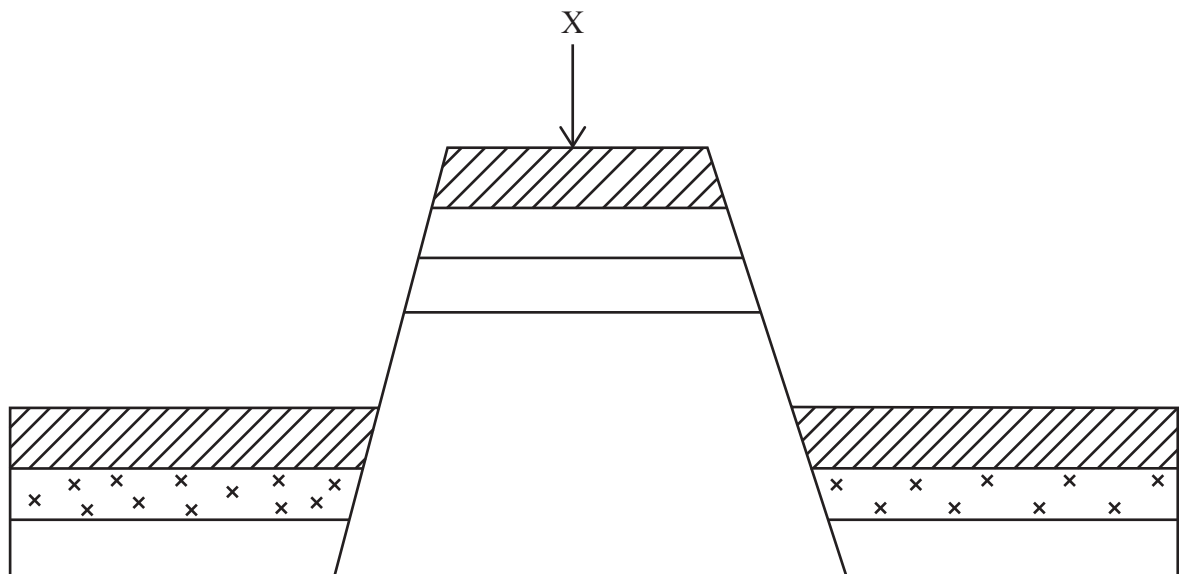

Which climate is represented by this station?

- A** Mediterranean in northern hemisphere.
- B** Mediterranean in southern hemisphere.
- C** Savanna in northern hemisphere.
- D** Savanna in southern hemisphere.

16. Which weather hazard can affect subsistence farmers in Zimbabwe between June and July?

- A** Dew
- B** frost
- C** Hail
- D** Lightning

17. Use the diagram below for questions 17 and 18.

Name the landform **X**.

- A** Rift valley.
- B** Ridge.
- C** Fold mountain.
- D** Block mountain.

18. The landform **X** in question 17 is formed by
- A weathering.
 - B volcano.
 - C folding.
 - D faulting.
19. Which one is an example of fold mountains in the Eastern part of Zimbabwe?
- A Binga range
 - B Chimanimani range
 - C Mavuradona range
 - D Mvurwi range
20. What is the effect of river siltation to communities near large rivers such as Save?
- A Drought
 - B Floods
 - C Landslides
 - D Tsunamis
21. Which process changes nitrogen and ammonia into nitrates and nitrites?
- A Denitrification
 - B Eutrophication
 - C Leaching
 - D Nitrification

22.

method of restoring ecosystems	% of people practising the method
Crop Rotation	47,61
Gulley filling	19,04
Educational campaigns	0,04
Grass planting	28,28

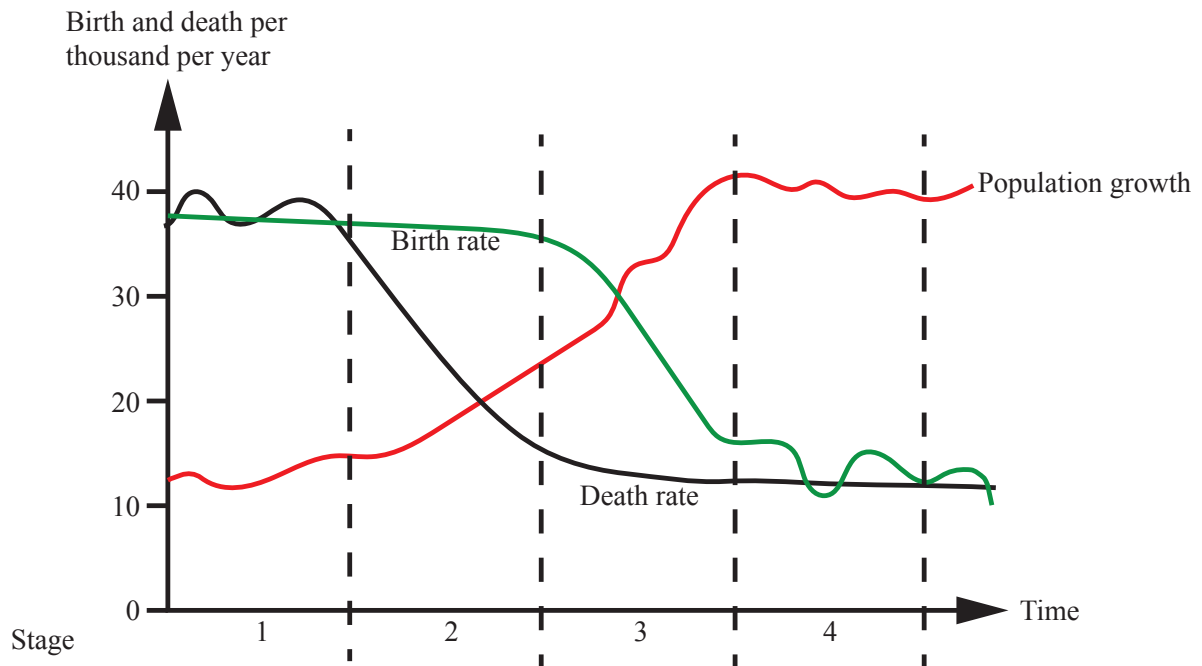

Which method proves to be effective in restoring ecosystems?

- A Crop rotation
- B Education campaigns
- C Grass planting
- D Gulley filling

23. Which activity increases the amount of rainfall?
- A afforestation
 - B damming
 - C Panning
 - D Siltation
24. “Wild pigs destroy crops and attack people. On the other hand, people hunt wildlife and chase them away from their fields.”
- The situation above describes
- A culling of wildlife.
 - B human wildlife conflict.
 - C wildlife conflict.
 - D wildlife poaching.
25. Which mineral is mined at Sengwa in Gokwe?
- A Lithium
 - B Iron
 - C Copper
 - D Coal.
26. Which type of pollution is caused by panning?
- A Air pollution
 - B deforestation
 - C visual pollution
 - D water pollution
27. Chirinda forest is under which type of industry?
- A Primary
 - B Quaternary
 - C Secondary
 - D Tertiary
28. Poaching is
- A culling of wild animals.
 - B conservation of wild animals.
 - C illegal hunting of wild animals.
 - D legal hunting of wild animals.

29. Urban agriculture is expanding in Zimbabwe due to the need to
- A reduce robberies.
 - B improve food security.
 - C generate foreign currency.
 - D clear the land.
30. Market gardening and dairy farming are both characterised by
- A low capital input.
 - B low labour input.
 - C high capital input.
 - D high labour input.
31. The fall in Zimbabwe's agriculture production between 2023 and 2024 could have been due to
- A pests.
 - B floods.
 - C drought.
 - D heat.
32. Farmers in drought prone communities can reduce the risk of losses by practising
- A basin irrigation.
 - B drip irrigation.
 - C sprinkler irrigation.
 - D siphon irrigation.
33. How can life expectancy be increased?
- A good diet
 - B reduce birth rate
 - C increase leisure time
 - D improve health care

34.

The implementation of women empowerment policies corresponds to

- A stage 1 of the Demographic Transition model
- B stage 2 of the Demographic Transition model
- C stage 3 of the Demographic Transition model
- D stage 4 of the Demographic Transition model

35. How can the problem of housing shortages in Zimbabwe's cities be addressed?

- A constructing garden flats.
- B constructing hybrid cities.
- C constructing multi storey flats.
- D constructing underground bunkers.

36. The exchange of goods and services between Zimbabwe and Botswana is

- A bilateral trade.
- B invisible trade.
- C multilateral trade.
- D visible trade.

37. Which method helps to solve traffic congestion during peak hours?

- A one way roads
- B roundabouts
- C spaghetti roads
- D traffic lights

38. Environmental management is the responsibility of
- A all citizens.
 - B community leaders.
 - C school children.
 - D the government.
39. Which type of energy can be produced at a local level in Zimbabwe?
- A nuclear
 - B thermal
 - C geothermal
 - D biogas
40. The use of renewable energy resources in the community helps to
- A control climate change.
 - B reduce greenhouse gas emissions.
 - C reduce exposure to diseases.
 - D reduce occurrence of natural disasters.
