SPECIMEN PAPER

Additional materials:
Answer booklet

Allow candidates 5 minutes to count pages before the examination.

INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces provided on the answer booklet.

Read the provided passage very carefully before you attempt any question.

Check that the question paper has all pages and ask the invigilator for a replacement if there are duplicate or missing pages.

Answer **all** questions.

Write your answers on the separate answer paper provided using **black** or **blue** pens.

Leave a space of one line between your answers to each part of a question e.g. between 1(a) and (b). Leave a space of at least three lines after your completed answer to each whole question.

Answer question 3 on the grid answer sheet provided by Zimsec in the answer booklet.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question. Mistakes in spelling, punctuation and grammar may be penalised in any part of the paper.

This specimen paper consists of 7 printed pages.

SECTION A (40 MARKS)

You are advised to spend **not more than 1 hour 30 minutes** on this section.

Read the following passage very carefully before you attempt any question.

Answer **all** questions.

Mistakes in spelling, punctuation and grammar may be penalised in any part of the paper.

(The passage below looks at how two projects, one in Victoria Falls and another one in Bulawayo, have used innovation in waste management to benefit local communities.)

- 1 Villagers from the Dibutibu community, on the outskirts of Victoria Falls, have started benefiting from an anti-poaching wire snares recycling programme that was initiated by Jafuta Foundation through its commercial arm, Batoka Creatives.
- 2 Jafuta Foundation is a non-profit making organisation and Batoka Creatives is its commercial arm. Both were founded by Mrs Gail van Jaarsveldt. Batoka Creatives was established after Covid-19, partly as a response to the **adverse** effects of the pandemic with a focus on gender-based violence among the priority areas. 5
- 3 Dozens of women, men and the youths are benefiting, firstly from skills training on making artefacts from rusted wire snares and also from awareness-raising initiatives by the organisation. The materials are being obtained from the Victoria Falls Anti-Poaching Unit, which removes about 200 kilogrammes of wire snares every year from the bush. The wires are heated by blacksmiths and given to men and women groups to make necklaces, beads, bracelets, earrings and other artefacts, which are then sold. 10
- 4 Training is taking place at Jafuta Foundation Centre in Dibutibu. Here, youths from the communities get free extra lessons, sports coaching, gardening and ICT skills training as well as socio-health education. 15
- 5 Dibutibu, Sizinda, Chidobe, Vulindlela and surrounding areas in Kachechete and Chidobe wards have high rates of school drop-outs as a result of early marriages and teenage pregnancies. The Covid-19 pandemic also exposed high rate of domestic violence and gender-based violence. 20
- 6 Project Sales and Marketing Manager, Ms Kisintseng Ncube, said, besides uplifting livelihoods, the project seeks to empower young people to stay away from engaging in drug abuse, protect them from abuse and child marriages as well as educate the community on the adverse impact of domestic violence. The project was launched in Victoria Falls by the Town Council where different stakeholders such as businesspersons, ordinary citizens and tourism industry players attended. 25
- 7 “Batoka Creatives mainly works with women who have been affected by gender-based violence from Dibutibu. They are trained to make necklaces, beads, bracelets and other artefacts from recycled wire snares,” said Ms Ncube. She said the Victoria Falls Anti-Poaching Unit, which collects about 200 kilogrammes of snares annually from the bush, provides the materials used by Batoka Creatives. 30

- 8 “We are empowering women because they are the breadwinners. They take care of the family most of the time,” said Ms Ncube. She said the project was important in raising awareness on the dangers of poaching activities and promoting co-existence with animals. 35
- 9 Victoria Falls is a **prime** tourist destination with thousands of people from across the world coming to view wildlife in the jungle, hence the importance of keeping the destination in its pristine state without killing wild animals. Ms Ncube said the programme has so far helped a lot of people and plans are underway to spread to other communities and **rope in** more women. 40
- 10 In another related development, Mr Ndhlovu of Paddenhurst suburb has since formed a waste recycling company, Noble Savage. The company, which was established in 2019, recycles waste plastics and glasses from the city’s waste collection sites and landfills to manufacture eco-friendly building materials that include roof tiles, pavers and kitchen countertops. 45
- 11 The company operates from Westondale industrial area in Bulawayo. Noble Savage collects plastic waste from individuals, mostly **vulnerable** members of society such as widows, orphans and the elderly. 50
- 12 The company was given a licence to collect waste in the City of Bulawayo during the Independence Celebrations in April. To date, the company has created about fourteen formal jobs and more than one hundred jobs for waste pickers. Mr Ndhlovu said they are hoping to create a huge processing plant, which will create more than two thousand jobs for locals. With an investment of about US\$55 000, the company has managed to acquire machines, which include a bailer, bottle crusher, boiler and other equipment. 55
- 13 In an interview yesterday, Mr Ndhlovu said the idea of forming a company came in 2018 through a dream when he was still under his parents’ roof. “I had a dream in which I was shown formulas of how I could go about it in terms of the products. I did some research to add to what I had dreamt and **perfected** the idea. In 2019, I registered the company and operated in the backyard of my parents’ house in Morningside suburb,” said Mr Ndhlovu. He said when the backyard became too small for the growing company, he decided to find a bigger space and **relocated** to Westondale industrial area. 60 65
- 14 Mr Ndhlovu said they collect waste material from waste pickers, which they then crush separately after which it is bailed. “The material is then smelted with different ingredients and cast into various products. The end product is polished to achieve the desired finish. We make innovative building materials by utilising waste, targeting the environmentally conscious individual who seeks something aesthetically designed, durable and affordable,” he said. 70
- 15 Mr Ndhlovu said their long-term vision is to produce building materials that are in compliance with clean renewable energy. “Our vision is to be a leading producer of low-cost building materials that incorporate high technology to help accelerate Africa’s transition to clean renewable energy,” he said. 75

- 16 Mr Ndhlovu said he realizes between US\$ 3 500 and US\$4 500 in monthly profits from the finished products.
- 17 Through his innovative initiative, the young entrepreneur has not only improved the cleanliness and sustainability of Bulawayo, but also provided employment opportunities for over one hundred individuals who pick waste across the city. 80
 “Over the past few years, we have created direct employment for eight people and over one hundred people who collect waste materials across the city,” said Mr Ndhlovu.
- 18 He said the company has medical insurance to help workers, including those contracted to pick up waste, to access healthcare services. “All our workers have regular check-ups as picking up waste exposes them to risk of contracting diseases and those who fall sick 85
 are immediately attended to,” said Mr Ndhlovu.
- 19 He said the company’s target is now to penetrate the Southern Africa regional market. “We **dream** of having bigger factories in the upcoming years and to have a strong influence in Southern Africa as we pursue our goal of creating a smart and clean Africa through recycling waste,” he said. 90
- 20 Mr Ndhlovu said they have also partnered with some local universities in terms of waste management as part of their social corporate responsibility. “We have partnered with some universities such as NUST Enactus, Lupane Enactus to assist them prepare for their National competitions in waste management and entrepreneurship. We have also held campaigns at schools about recycling waste and waste management,” he said. 95
- 21 Mr Ndhlovu said they are also looking forward to getting into retail and wholesale outlets but at the moment they are producing according to orders. “We now want to **mass produce** so that customers can walk in any time and get the products,” he said.
- 22 Mr Ndhlovu said their vision is to become the leading manufacturer of low-cost building materials that incorporate high technology to help Africa’s acceleration to clean renewable energy. On this, it is important to note that in 2019 his company was the runner-up for ILO Green Enterprise as the most innovative green business. 100

From paragraph 15

- (c) If you were a consultant, what advice would you give Mr Ndhlovu for him to realise his vision of becoming a leading manufacturer of low cost building materials that incorporate high technology? [1]

From the whole passage

- (d) Choose **five** of the following words or phrases which are in bold print in the passage. For each of them, give one word or a short phrase, of not more than seven words, which has the same meaning that the word or phrase has in the passage.

1. adverse (paragraph 2)
2. prime (paragraph 9)
3. rope in (paragraph 9)
4. vulnerable (paragraph 11)
5. perfected (paragraph 13)
6. relocated (paragraph 13)
7. dream (paragraph 19)
8. mass produce (paragraph 21)

[5]

- 3 Part of the passage gives an account of Mr Ndhlovu's innovative project on Waste Management. Write a summary of the benefits accrued from Mr Ndhlovu's project, its vision and the intended benefits.

Use the material from paragraph 10 to the end of paragraph 22.

Your summary, which should be in continuous writing (not note form, must **not be longer than 160 words**, including the given ten (10) words. Each word should be written in a separate box on the grid answer sheet attached in the ZIMSEC answer booklet. If you make a mistake, cancel the word(s) and write the correct word(s) in the same box(es) above or next to the cancelled word(s).

Begin your summary as follows:

Noble Savage was established to benefit the surrounding community by... [20]

SECTION B (10 MARKS)

You are advised to spend **not more than 30 minutes** on this section.

Answer **all** the questions.

- 4 (a) Rewrite the following sentences putting the underlined words into their plurals. You may make necessary changes to the sentences to make them grammatically correct.
- (i) Poachers in Dibutibu used snares to catch a goose. [1]
- (ii) The poachers' snares were sometimes damaged by a mouse. [1]
- (b) Rewrite these sentences correcting the errors in them.
- (i) Contrary with popular belief, poachers never steal at night. [1]
- (ii) He was convicted on poaching and was sent to jail. [1]
- (c) Complete each of the following sentences by using the opposite of one of the words contained in it.
- (i) After the rigorous training at Jafuta Foundation Centre, the youth felt more dead than _____. [1]
- (ii) Seeing that the girls were in danger, the policeman evacuated them to a place of _____. [1]
- (d) Re-write the following sentences using capital letters where necessary.
- (i) victoria falls is a prime destination for american and british tourist at easter. [1]
- (ii) I visited the project sales and marketing manager at her munhumutapa offices and she welcomed me with a smile. [1]
- (e) Complete the following sentence using an appropriate relative pronoun from those given (who, whom, whose)
- (i) The poachers, _____ snares were taken, were all arrested. [1]
- (ii) Join the following two statements using "not only... but also"
1. Jafuta Foundation Waste Management has empowered the youths.
 2. The community's livelihood has improved.
- [1]
