SPECIMEN PAPER

24 HOUR INSTRUCTIONS TO SUPERVISORS

Great care should be taken that any confidential information given does not reach the candidates either directly or indirectly.

Teachers responsible for the examination are **NOT** allowed to consult the question paper before the examination **Date** and **Time**.

It is essential that candidates accept the descriptions of the solutions as they appear in the question paper.

These instructions consist of 3 printed pages.

Copyright: Zimbabwe School Examinations Council, Specimen Paper.

The Science kit must contain

BaCl_2

NaOH

NH_3

HCl

aluminium foil

red litmus paper

AgNO_3

KOH

H_2SO_4

ammonium chloride

aluminium chloride

Each candidate should be provided with the following:

120 cm³ of **solution R**

120 cm³ of **solution S**

1-2 g of Chemical **C**

distilled water

1 polystyrene cup

Access to the following qualitative reagents:

1 mol/dm³ BaCl₂

1 mol/dm³ NaOH

1 mol/dm³ NH₃

dilute HCl

aluminium foil

red litmus paper

0.5 mol/dm³ AgNO₃

The chemicals required are described below.

NB: Chemical C is a mixture of ammonium chloride and aluminium chloride, mixed in the ratio 1:1.

Solution **R** is 1.0 mol/dm³ H₂SO₄

Solution **S** is 2.0 mol/dm³ KOH

The identities of Chemical C, solution R and S should not be revealed to candidates.

The Supervisor, or other competent chemist **must** out of sight of candidates, carry out the experiments and complete the tables of readings and observations on a spare copy of the question paper which should be labelled 'Supervisor's Results'.
