SPECIMEN PAPER

INSTRUCTIONS TO CANDIDATES

1. Read **all** the instructions carefully.
2. Do **not** open this booklet until you are told to do so by the invigilator.
3. Use **only** an **HB** pencil for all entries on the answer sheet.
4. When you are told to start, choose **one** correct answer from the suggested answers and shade it **very dark** as shown in the examples at the top of the answer sheet.
5. If you wish to change your answer, **erase it completely** with a rubber and then shade the new choice.
6. If **more** than **one** lozenge is shaded for any one answer, that answer will be regarded as wrong.
7. Answer **all** the questions on the separate answer sheet provided.

INFORMATION FOR CANDIDATES

Each question carries one mark

This specimen paper comprises 8 printed pages.

Copyright, Zimbabwe School Examinations Council, Specimen paper.

1. Which factor contributes most to population increase in Zimbabwe?
 - A high birth rate
 - B migration
 - C immigration
 - D high death rate
2. Choose a producer in an ecosystem from the list.
 - A grazers
 - B plants
 - C browsers
 - D omnivores
3. Choose a disaster that affects tomato production from the list.
 - A frost
 - B veld fires
 - C hailstorm
 - D cyclone
4. Select a method used for harvesting timber.
 - A deluging
 - B seasoning
 - C clear cutting
 - D sap displacement
5. Conflicts between wildlife and humans can be minimised by
 - A killing wild animals.
 - B avoid growing crops.
 - C fencing of the field.
 - D clearing of the land.
6. Choose the role of the government of Zimbabwe in wildlife management.
 - A training members of the community as scouts and professional hunters
 - B enforcing by-laws which protect endangered species
 - C revenue collection for sustaining the government
 - D monitoring wildlife

7. Water quality is affected by
- A agricultural chemicals.
 - B volume of available water.
 - C atmospheric pressure.
 - D sources of water.
8. Rain water is harvested by
- A roofs and gutters.
 - B aquifers and minimum tillage wells.
 - C springs and intercropping.
 - D wells and crop rotation.
9. Which type of rock is formed as a result of cooling and solidification of molten lava?
- A metamorphic
 - B sedimentary
 - C igneous
 - D limestone
10. Soil temperature is influenced by
- A water in the soil and micro-organisms.
 - B organic matter and infiltration.
 - C colour of soil and amount of solar radiation.
 - D dark soil and amount of solar radiation.
11. What are the possible causes of water pollution?
- A animal waste and canals
 - B gold panning and fertiliser deposits
 - C agriculture chemicals and ponds
 - D aquifers and gold panning activities

12. Contour ridges and storm drains are constructed to

- A reduce soil erosion and improve drainage.
- B reduce runoff and increase infiltration.
- C divert water to the field.
- D increase seepage and soil erosion.

13. Distinguish between non-mineral essential elements and secondary elements.

	Non-mineral elements	Secondary elements
A	derived from the air and water	applied as soil amendments
B	required in small quantities	required in large quantities
C	required in relatively large amounts by plants	found in commercial fertilisers
D	Required for normal plant growth	needed to give rise to a pale green colour

14. In which organelle does aerobic respiration occur?

- A nucleus
- B lysosome
- C mitochondria
- D endoplasmic

15. Determine the amount of water required to mix **150 g** of Malathion **25% WP**, in the school garden, if **20 g** is required for every **10** litres of water.

- A 10 litres
- B 37.5 litres
- C 75 litres
- D 170 litres

16. What is the advantage of silos in Zimbabwe?

- A acts as a drier for harvested maize
- B cheap and easy to construct
- C large volumes of grain are stored
- D easy to inspect

17. Which vector transmits maize streak virus?

- A aphids
- B beetles
- C scales
- D leaf hoppers

18. Where is synthesized food stored in a cereal crop?
- A grain
 - B root
 - C stem
 - D tassel
19. Agro-chemicals are safely stored in a
- A kitchen.
 - B corner of the garden.
 - C securely locked storeroom.
 - D closed bucket.
20. Mulching is important because it
- A increases the need for frequent watering.
 - B prevents seed germination completely.
 - C removes nutrients from the soil.
 - D helps retain moisture and suppresses weeds.
21. A plant that is poisonous to farm animals is
- A lantana camara.
 - B black jack.
 - C sabi morning glory.
 - D couch grass.
22. Adlib feeding differs from ration feeding, in that
- A animals are fed twice a day.
 - B animals are fed thrice a day.
 - C food is available all the time.
 - D animals are given commercial feeds.
23. The function of Vitamin E in farm animals is for
- A good eye sight.
 - B normal growth.
 - C blood clotting.
 - D fertility.
24. The process of removing animals with undesirable characteristics is called
- A isolation.
 - B quarantining.
 - C slaughtering.
 - D culling.

25. What is the purpose of stunning when slaughtering rabbits?
- A improves blood circulation
 - B avoids loss of blood
 - C kills the rabbit
 - D minimises pain
26. When a calf gets antibodies from colostrum it is called
- A natural acquired passive immunity.
 - B natural acquired active immunity.
 - C artificial acquired passive immunity.
 - D artificial acquired active immunity.
27. Why is nail clipping necessary in rabbits?
- A makes them look clean
 - B prevents injuries when fighting
 - C prevents disease transmission
 - D prevents them from burrowing holes
28. What materials are used to make harnesses?
- A leather and rubber
 - B wood and metal
 - C rubber and metal
 - D leather and wood
29. What is placed between straining posts to avoid wagging of the wire strands?
- A droppers
 - B rails
 - C standards
 - D anchors
30. The advantage of using a sheller is
- A time consuming.
 - B faster.
 - C expensive.
 - D need for a skilled person.
31. What should be considered when selecting a live fence?
- A poisonous to livestock
 - B edible to farm animals
 - C a rapid growth rate
 - D expensive to establish

32. Choose the correct combination on fencing.

	Tool	Use
A	digging bar	cut trees along path of the fence
B	pliers	cutting wire
C	hammer	digging holes for erecting poles
D	bow saw	drive nails into posts

33. Calculate the cost of 5 000 farm bricks being sold at \$0.50 each.

- A \$25 000
- B \$2 500
- C \$250
- D 25

34. Key principle of cooperatives is

- A identifying numbers and names.
- B giving price information.
- C sharing ideas amongst members.
- D having depreciation schedule for assets.

35. What is the importance of financial records to farmers?

- A estimate the value of the farm
- B compare alternatives at the farm
- C look for alternatives at the farm
- D outline expansion opportunities at the farm

36. What are the functions of a profit and loss account on the farm?

- A buying and selling of agricultural products
- B grading and transporting
- C packaging and advertising
- D comparison of income and expenditure

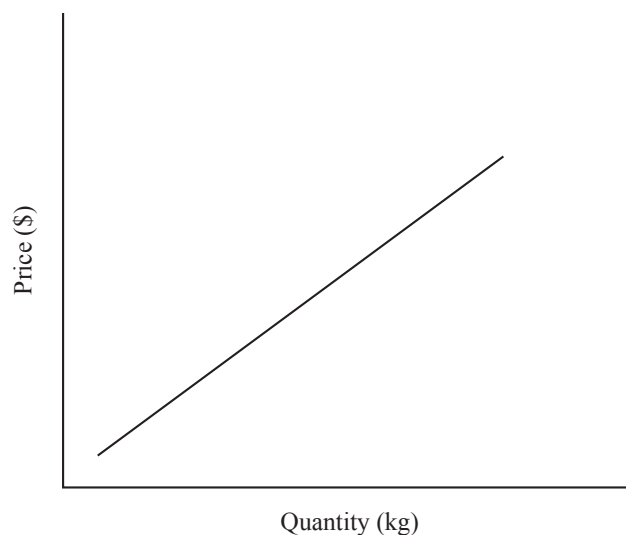

37. An example of a production record is a

- A telephone bill.
- B stock register.
- C water bill.
- D journal.

38. The price of rape falls when
- A demand is high and supply is low.
 - B demand is low and supply is low.
 - C supply is high and demand is high.
 - D supply is high and demand is low.

39. What is the formula for calculating profit?
- A $\text{income} + \text{expenditure}$
 - B $\text{income} \times \text{expenditure}$
 - C $\text{income} - \text{expenditure}$
 - D $\text{income} \div \text{expenditure}$

40. Study the graph and answer the question that follows.

The graph shows a

- A demand curve.
- B supply curve.
- C demand schedule.
- D supply schedule.
