SPECIMEN PAPER

Additional materials:
CD or flash disk
Printing facility
Bond paper

INSTRUCTIONS TO CANDIDATES

Insert your name, centre number and candidate number as a header, where appropriate.

Answer **all** questions.

For each question, indicate software used.

Print screenshots for all designs.

Submit both the hard copy and soft copy of your answers. Work on CD or flash disk without hard copy will not be marked.

Database printouts should be done from the package used.

Web design print outs must clearly show the address bar of the web page.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question.

This specimen paper consists of 6 printed pages.

[Turn over

- 1 A movie house allows only clients aged 13 years and above to watch a certain movie. The output is either “Allow Entry” or “Restricted” after entering age.

(a) Design an interface as shown below and print it.

[3]

(b) Write the program code for the problem and print the code.

[6]

(c) Print a screenshot of the interface with output.

[1]

- 2 (a) Write a program code that will be used by an accountant at your school to calculate and display the interest (I), given the principal (P), the rate (R) and the time (T). The accountant uses the following formula to calculate the interest.

$$\text{Interest} = \frac{\text{Principal (p)} \times \text{Rate (R)} \times \text{Time (T)}}{100}$$

The result should be displayed in a label.

[16]

(b) Produce the output with the following format

“The Interest is”.

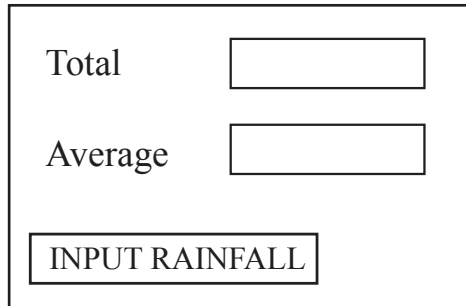

[4]

NB: Use values of your choice

3

3 Accurate rainfall measurement help farmers to plan their activities and ensure food security.

- (a) Design an interface as shown below that accepts rainfall patterns using an input box.

The interface is enclosed in a rectangular border. Inside, the word 'Total' is positioned to the left of a rectangular input box. Below this, the word 'Average' is positioned to the left of another rectangular input box. At the bottom of the interface is a rectangular button with the text 'INPUT RAINFALL' inside it.

[6]

Print the interface

- (b) Using a loop, write the program code that allows the user to:
- enter monthly rainfall amounts for 5 months.
 - calculate and display the total rainfall in a text box.
 - calculate and display the average rainfall

Print the program code and the output.

NB: Use any values of your choice.

[14]

- 4 Your school library manually keeps records of books borrowed in a counter book. Create a database called Library to help the librarian to keep track of borrowing.

(a) Create the following tables in your database.

(i) Books

Book 1D	Title	Author	Category	Availability
ABD0001	Tambaoga Mwanangu	Giles Kuimba	Novel	Borrowed
AF002	Information Systems	Kapondeni Jervas	ICT	Available
ACQ003	Life of Mandela	Lead Pesulu	History	Borrowed
AGP004	Our Heritage	French Bachi	Heritage	Borrowed
AEg005	Women in ICT	Mufaro Gomo	ICT	Available

[4]

(ii) Borrowers

Borrower ID	Book 1D	Full Name	Class	Book Borrowed	Date Borrowed
BCD001	ABD001	Camila Daisy	F3	Tambaoga Mwanangu	05/07/25
BCD002	ACQ003	Keisha Munyira	F4	Life of Mandela	10/09/25
BCD003	AGP004	Soja Madende	F4	Our Heritage	11/10/25

[4]

(b) Create a relationship between two tables using Book ID and Print. [2]

(c) Design a query that displays all books borrowed including the **Borrower ID**. Name the query Borrowed. [4]

5

- (c) Design a form to input data into the borrowers table using Add New button. [5]
Print the blank form.
- (d) Sort records in the books table in descending order of category. [3]
Save the table as Sorted. Print the table.
- (e) Generate a report showing all books available in the library. [4]
Print the report.
- (f) Use an Update query to change author Giles Kuimba to Junior Gwelo. [4]
Print the query design and the table after the effects of the update.

- 5** (a) Create a website with **two** pages named HOME and Contact us.

The contents of the pages are as follows.

HOME

- Title to the website “EGG PRODUCTION”
- Heading with the following text “EGG FOR SALE” and underline

Table

Number of eggs	Price
6	\$1
12	\$2
30 (crates)	\$4,50

Contact us

- email address and phone number of your choice
 - email address and phone number must be bulleted [12]
-
- (b) (i) - Insert an image on the home page. [2]
- Type a sentence that will read: “Thank you all for your support.
Eggs are always available from 9 am till 3:30 pm.” [2]
- add a horizontal ruler [2]
- (ii) Link the two pages. [2]

Print the two webpages and the code.
